PROFESSIONAL SUMMARY

Data scientist with hands-on experience in data cleaning, visualization, and statistical modeling. Driven by a love for math, problem-solving, and both practical and theoretical learning. Approaching data with curiosity and a focus on clarity and theory, to uncover insights that inform decision-making and tell meaningful stories.

Programming: R (Advanced), Python (Intermediate), SQL (Intermediate)

Tools: Git, Tidyverse, Tidymodels, scikit-learn, Pandas, NumPy

EDUCATION

Master of Science in Analytics

May 2026

Institute for Advanced Analytics, NC State University, Raleigh, NC

Bachelor of Science in Mathematics, Statistics, *Magna Cum Laude*

May 2025

Appalachian State University, Boone, NC

PRACTICUM

Golden Set Analytics

Sep 2025—May 2025

- Leverage Python and R to clean and analyze 2.5+ million tennis match points, identifying patterns that support performance evaluation and predictive insights
- Design and train machine learning models to forecast tennis serve directions, improving prediction accuracy and supporting strategic gameplay decisions
- Apply feature selection and engineering techniques in Python to improve the interpretability and performance of predictive models
- Built an interactive dashboard to help present results and findings

ANALYTICAL PROJECTS

Tableau Dashboard for NC State Tennis

Sep 2025—Oct 2025

- Utilized R and Python to create calculated metrics for gauging a player's performance across their 4-year career
- Made an interactive dashboard in Tableau with the intention of being used to recruit players and show growth over the course of a career and improve current players

House Price Predictions Competition

Sep 2024—Dec 2024

- Processed 17k+ data points across 20 variables of houses
- Utilized predictive modeling to predict 4k+ house prices
- Placed 4th out of 25 competitors
